

Chronological Index

- J02-085 Assessment of the Accuracy of Representing a Helical Vortex by Straight Segments.** D. H. Wood and D. Li, *University of New Castle, Australia* (40, 4, p.647) Article
 Technical Comment by D. I. Greenwell, *University of Bristol, England, U.K.* (41, 2, p.332)
 Reply (41, 2, p.333)
- J02-088 Acoustic Analogy and Alternative Theories for Jet Noise Prediction.** Philip J. Morris, *Pennsylvania State University*; and F. Farassat, *NASA Langley Research Center* (40, 4, p.671)
 Technical Comment C. K. W. Tam, *Florida State University* (41, 9, p. 1844)
 Reply (41, 9, p. 1845)
- J02-178 Large-Eddy Simulation of a Turbulent Compressible Round Jet" vis-à-vis Lighthill's Theory of Jet Noise.** James R. DeBonis, *NASA John H. Glenn Research Center*; and James N. Scott, *The Ohio State University* (40, 7, p.1346) Article
 Technical Comment by H. S. Ribner, *University of Toronto, Canada* (41, 4, p.750)
 Reply (41, 4, p.751)
- J02-184 Structural Damage Detection by Generic Algorithms.** Kaazem Moslem and Ramin Nafaspour, *Ferdowsi University, Iran* (40,7,p.1395) Article
 Technical Comment by Menahem Baruch, *Technion—Israel Institute of Technology, Israel* (41, 3, p. 559)
- J02-208 Effect of Surface Roughness on Unseparated Shock-Wave/ Boundary-Layer Interactions.** H. Babinsky, *University of Cambridge, England, UK*; and G. R. Inger, *Iowa State University* (40, 8, p. 1567) Article
 Errata (41, 12, p.2508)
- J03-001 Leading-Edge Vortex Structure of Nonslender Delta Wings at Low Reynolds Number.** Michael V. Ol, *U.S. Air Force Research Laboratory*; and Morteza Gharib, *California Institute of Technology* (41, 1, p. 16) Article
- J03-002 Curvature Based Wall Boundary Condition for the Euler Equations on Unstructured Grids.** Z. J. Wang and Yuzhi Sun, *Michigan State University* (41, 1, p. 27) Article
- J03-003 Laminarization of Turbulent Boundary Layer on Flexible and Rigid Surfaces.** Lucio Maestrello, *NASA Langley Research Center* (41, 1, p. 34) Article
- J03-004 Generalized Logarithmic Law and Its Consequences .** Matthias H. Buschmann, *Technische Universität Dresden, Germany*; and Mohamed Gad-el-Hak, *Virginia Commonwealth University* (41, 1, p. 40) Article
- J03-005 Stable Numerical Method Applying a Total Variation Scheme for Incompressible Flow.** Byeong Rog Shin, *Tohoku University, Japan* (41, 1, p. 49) Article
- J03-006 Boundary Conditions for Euler Equations.** Sylvie Benzoni-Gavage and Jean-Francois Coulombel, *Centre National de la Recherche Scientifique, France*; and Stéphane Aubert, *Ecole Centrale de Lyon, France* (41, 1, p. 56) Article
- J03-007 Mechanism of Shock Wave Oscillation in Transonic Diffusers.** Taro Handa and Mitsuharu Masuda, *Kyushu University, Japan*; and Kazuyasu Matsuo, *The University of Kitakyushu, Japan* (41, 1, p. 64) Article
- J03-008 Experimental Investigation of the Flow Past a Submarine at Angle of Drift.** David Bridges, *Mississippi State University*; and Jimmy N. Blanton, Wesley H. Brewer, and Joel T. Park, *U.S. Navy William B. Morgan Large Cavitation Channel* (41, 1, p. 71) Article
- J03-009 Fault Classification Using Pseudomodal Energies and Neural Networks.** Tshilidzi Marwala, *Dzinet Investment Holding, Republic of South Africa* (41, 1, p. 82) Article
- J03-010 Multilayered Piezoelectric Refined Plate Theory.** Claire Ossadzow-David, *Université Paris VI, France*; and Maurice Touratier, *Ecole Nationale Supérieure, France* (41, 1, p. 90) Article
- J03-011 Superelastic and Shape Memory Effects in Laminated SMA Beams.** S. Marfia, E. Sacco, *University of Cassino, Italy*; and J. N. Reddy, *Texas A&M University* (41, 1, p. 100) Article
- J03-012 High-Order Analysis of Unidirectional Sandwich Panels with Piezolaminated Face-Sheets and Soft Core.** Oded Rabinovitch, Jack R. Vinson, *University of Delaware*; and Yeoshua Frostig, *Technion—Israel Institute of Technology, Israel* (41, 1, p. 110) Article
- J03-013 Structural Integrity Re-design Through Neural Network Inverse Mapping.** R. M. Pidaparti and S. Jayanti, M. J. Palakal and S. Mukhopadhyay, *Indiana University—Purdue University at Indianapolis* (41, 1, p. 119) Article
- J03-014 New Numerical Method for Two-Dimensional Partially Wrinkled Membranes.** Hongli Ding and Binggen Yang, *University of Southern California*; and Michael Lou and Houfei Fang, *Jet Propulsion Laboratory, California Institute of Technology* (41, 1, p. 125) Article
- J03-015 Viscous Supersonic Flow over Moving Compression Ramp.** S. O. Park, C. H. Lee and K. M. Kang, *Korea Advanced Institute of Science and Technology, Korea* (41, 1, p. 133)
 Technical Note based on AIAA Paper 2001-0568
- J03-016 Modification of a Circular Near Wake by a Rectangular Jet.** D. M. Rooney, *Hofstra University*; and M. S. Gaspin, *Hofstra University* (41, 1, p. 137) Technical Note
- J03-017 Rotating Multilayer Cylindrical Shells to Impact Loading.** S. W. Gong and K. Y. Lam, *Institute of High Performance Computing, Singapore* (41, 1, p. 139) Technical Note
- J03-018 Recent Developments in the Research on Pulse Detonation Engines.** K. Kailasanath, *U.S. Naval Research Laboratory* (41, 2, p. 145) Article
- J03-019 Experimental and Theoretical Study on Rolling Effectiveness of Multiple Control Surfaces.** Deman Tang, Aiqin Li, and Earl H. Dowell, *Duke University* (41, 2, p. 160) Article

J03-020 Low-Reynolds-Number $k-\epsilon$ Modeling of Non-stationary Solid Boundary Flows. C. B. Hwang and C. A. Lin, *National Tsing Hua University, Taiwan, ROC* (41, 2, p. 168) Article

J03-021 Index-Matched Boundary Techniques for the Elimination of Acoustical Resonances. Jack H. Parker, *U. S. Air Force Research Laboratory*; and Bradley D. Duncan, *University of Dayton* (41, 2, p. 176) Article

J03-022 Prediction of Rod-Airfoil Interaction Noise Using the Ffowcs-Williams-Hawkins Analogy. Damiano Casalino, *Ecole Centrale de Lyon, France*; Marc Jacob, *Universite C. Bernard; Villeurbanne, France, France*; and Michel Roger, *Ecole Centrale de Lyon, France* (41, 2, p. 182) Article

J03-023 Humps/Steps Influence on Stability Characteristics of Two-Dimensional Laminar Boundary Layer. Anke Wörner, Ulrich Rist, and Siegfried Wagner, *University of Stuttgart, Germany* (41, 2, p. 192) Article

J03-024 Algorithm Developments for Discrete Adjoint Methods. Michael B. Giles and Mihai C. Duta, *Oxford University, England, UK*; Jens-Dominik Müller, *Queen's University, England, UK*; and Niles A. Pierce, *California Institute of Technology* (41, 2, p. 198) Article

J03-025 Split-Domain Harmonic Balance Solutions to Burger's Equation for Large Amplitude Disturbances. Raymond C. Maple, Paul I. King, *U.S. Air Force Institute of Technology*; J. Mitch Wolff, *Wright State University*; and Paul D. Orkwis, *University of Cincinnati* (41, 2, p. 206) Article

J03-026 Numerical Simulation: Supersonic Flow Around Wing-Body Configuration with Integrated Engine Nacelle. Masahiro Kanazaki, Shigeru Obayashi, and Kazuhiro Nakahashi, *Tohoku University, Japan* (41, 2, p. 213) Article

J03-027 Hybrid Reynolds-Averaged Navier-Stokes/Large-Eddy Simulations of Supersonic Turbulent Mixing. Nicholas J. Georgiadis, *NASA John H. Glenn Research Center*; and J. Iwin D. Alexander and Eli Reshotko, *Case Western Reserve University* (41, 2, p. 218) Article based on AIAA Paper 2001-2563

J03-028 Comparisons of Initially Turbulent, Low-Velocity-Ratio Circular and Square Coaxial Jets. Dimitris E. Nikitopoulos and Jason W. Bitting, *Louisiana State University*; and Sivaram Gogineni, *Innovative Scientific Solutions* (41, 2, p. 230) Article

J03-029 Lumped Element Modeling of Piezoelectric-Driven Synthetic Jet Actuators. Quentin Gallas, Ryan Holman, Toshikazu Nishida, Bruce Carroll, Mark Sheplak, and Louis Cattafesta, *University of Florida* (41, 2, p. 240) Article

J03-030 Decelerating Boundary Layer: A New Scaling and Mixing Length Model. A. Bernard, J. M. Foucaut, P. Dupont, and M. Stanislas, *Laboratoire de Mécanique de Lille, France* (41, 2, p. 248) Article

J03-031 Method to Improve the Accuracy of the Straight-Segment Representation of Helical Vortices. D. H. Wood, *University of Newcastle, Australia* (41, 2, p. 256) Article

J03-032 Flow-Tagging Velocimetry for Hypersonic Flows Using Fluorescence of Nitric Oxide. Paul M. Danehy, Sean O'Byrne, A. Frank P. Houwing, Jodie S. Fox, and Daniel R. Smith, *Australian National University, Australia* (41, 2, p. 263) Article

J03-033 Using Aeroelastic Modes for Nonlinear Panel Flutter at Arbitrary Supersonic Yawed Angle. Xinyun Guo and Chuh Mei, *Old Dominion University* (41, 2, p. 272) Article

J03-034 Dynamic Equivalence Conditions for Controlled Robotic Manipulators. M. Ghanekar, *Honeywell Engines, Systems, and Services, Canada*; and D. W.L. Wang and G. R. Heppler, *University of Waterloo, Canada* (41, 2, p. 280) Article

J03-035 Computational Inverse Technique for Material Characterization of Functionally Graded Materials. X. Han and G. R. Liu, *National University of Singapore, Singapore* (41, 2, p. 288) Article

J03-036 Thermally Induced Vibrations of Spinning Thin-Walled Composite Beam. Kyung-Eun Ko and Ji-Hwan Kim, *Seoul National University, Korea* (41, 2, p. 296) Article based on AIAA Paper 2002-1623

J03-037 Structural Analysis of Pneumatic Envelopes: Variational Formulation and Optimization-Based Solution Process. Frank E. Baginski, *George Washington University*; and Willi W. Schur, *New Mexico State University* (41, 2, p. 304) Article based on AIAA Paper 2002-1461

J03-038 Extrapolation Effects on Coupled Computational Fluid Dynamics/Computational Structural Dynamics Simulations. G. S. L. Goua, K. J. Badcock, M. A. Woodgate, and B. E. Richards, *University of Glasgow, United Kingdom* (41, 2, p. 312) Technical Note

J03-039 Vortex Interaction of a Delta Wing Flowfield. C. Shih and Z. Ding, *Florida A&M University and Florida State University* (41, 2, p. 314) Technical Note

J03-040 Numerical Study of N-Wave Propagation Using Optimized Compact Finite Difference Schemes. In Bo Shim, and Jae Wook Kim and Duck Joo Lee, *Korea Advanced Institute of Science and Technology, Republic of Korea* (41, 2, p. 316) Technical Note

J03-041 Effects of Combustion on the Sound Pressure Generated by Circular Jet Flows. Kapil K. Singh, Steven H. Frankel and Jay P. Gore, *Purdue University* (41, 2, p. 319) Technical Note

J03-042 Wall Boundary Effects of Wire-Wrapped Cylinders at High Reynolds Number. William J. Rowland and Hamid R. Rahai, *California State University* (41, 2, p. 322) Technical Note

J03-043 Oscillating Flows in a Model Pulse Detonation Engine Inlet. S. Mullagiri, C. Segal, and P. J. Hubner, *University of Florida* (41, 2, p. 324) Technical Note

J03-044 Differential Equation for the Amplitude of Wrinkles. Marcelo Epstein, *University of Calgary, Canada* (41, 2, p. 327) Technical Note

- J03-045 Contact Stress from Asymptotic Reissner-Mindlin Plate Theory.** Dewey H. Hodges, *Georgia Institute of Technology* (41, 2, p. 329) Technical Note
- J03-046 Comparison of Heat Transfer Augmentation Techniques.** P. M. Ligrani and M. M. Oliveira, *University of Utah*; and T. Blaskovich, *Pratt and Whitney Canada, Canada* (41, 3, p. 337) Survey
- J03-047 Aeroelastic Dynamic Analysis of a Full F-16 Configuration for Various Flight Conditions.** Philippe Geuzaine, Gregory Brown, Chuck Harris, and Charbel Farhat, *University of Colorado* (41, 3, p. 363) Article
- J03-048 Acoustics and Thrust of Quiet Separate-Flow High-Bypass Ratio Nozzles.** Naseem H. Saiyed, *NASA John H. Glenn Research Center*; Kevin L. Mikkelsen, *Aero Systems Engineering*; and James E. Bridges, *NASA John H. Glenn Research Center* (41, 3, p. 372) Article
- J03-049 Initial-Value Problem for Hypersonic Boundary-Layer Flows.** Alexander Fedorov, *Moscow Institute of Physics and Technology, Russia*; and Anatoli Tumin, *University of Arizona* (41, 3, p. 379) Article
- J03-050 High-Resolution Large-Eddy Simulation of Flow Around Low-Pressure Turbine Blade.** B. Raverdy, I. Mary, and P. Sagaut, *ONERA, France*; and N. Liams, *SNECMA Moteurs, France* (41, 3, p. 390) Article
- J03-051 Noise, Turbulence, and Thrust of Subsonic Freejets from Lobed Nozzles.** K.B.M.Q. Zaman, F. Y. Wang, and N. J. Georgiadis, *NASA John H. Glenn Research Center at Lewis Field* (41, 3, p. 398) Article
- J03-052 Helmholtz-Like Resonator Self Sustained Oscillations, Part 1: Acoustical Measurements and Analytical Models.** S. Dequand, X. Luo, J. Willems, and A. Hirschberg, *Eindhoven University of Technology, The Netherlands* (41, 3, p. 408) Article
- J03-053 Helmholtz-Like Resonator Self Sustained Oscillations, Part 2: Detailed Flow Measurements and Numerical Simulations.** S. Dequand, *Eindhoven University of Technology, The Netherlands*; S. Hulshoff, *Delft University of Technology, The Netherlands*; and H. van Kuijk, J. Willems, and A. Hirschberg, *Eindhoven University of Technology, The Netherlands* (41, 3, p. 416) Article
- J03-054 Dynamics of an Internal Flowfield Driven by Two Hydrodynamic Instabilities.** Jérôme Vétel, Frédéric Plourde, and Son Doan-Kim, *Ecole Nationale Supérieure de Mécanique et d'Aérotechnique, France* (41, 3, p. 424) Article
- J03-055 Structure of Flow over a Hypersonic Inlet with Side Compression Wedges.** Y. P. Goonko, A. F. Latypov, I. I. Mazhul, A. M. Kharitonov, and M. I. Yaroslavtsev, *Institute of Theoretical and Applied Mechanics, Russia*; and P. Rostand, *Dassault Aviation, France* (41, 3, p. 436) Article based on AIAA Paper 1998-1624
- J03-056 Effect of Geometrical Parameters on the Mixing Performance of Cantilevered Ramp Injectors.** Bernard Parent and Jean P. Sislian, *University of Toronto, Canada* (41, 3, p. 448) Article
- J03-057 Hydrogen and Helium Leak Rates from Micromachined Orifices.** I. D. Lee, O. I. Smith and A. R. Karagozian, *University of California* (41, 3, p. 457) Article
- J03-058 Nonequilibrium Radio Frequency Discharge Plasma Effect on Conical Shock Wave: $M = 2.5$ Flow.** Peter Palm, Rodney Meyer, Elke Plönjes, J. William Rich, and Igor V. Adamovich, *The Ohio State University* (41, 3, p. 465) Article
- J03-059 Optical Measurements of the Temperature in a Supersonic Jet.** Yann Marchesse, Yves Gervais, and Henri Foulon, *Université de Poitiers, France* (41, 3, p. 470) Article
- J03-060 Probe to Measure Direction and Strength of Moving Shocks or Blast Waves.** Yiannis Andreopoulos, Minwei Gong, Zhexuan Wang, and Savvas Xanthos, *City College of the City University of New York* (41, 3, p. 476) Article
- J03-061 Aeroacoustic Instability in Rockets.** Gary A. Flandro, *University of Tennessee Space Institute*; and Joseph Majdalani, *Marquette University* (41, 3, p. 485) Article based on AIAA Paper 2001-3868
- J03-062 Improved Dynamic Flexibility Method for Extracting Constrained Modes from Free Test Data.** De-Wen Zhang, *Beijing Institute of Structure and Environment Engineering, PRC*; and Fu-Shang Wei, *Kaman Aerospace Corporation* (41, 3, p. 498) Article
- J03-063 Approximate Vibration Reanalysis of Structures.** Uri Kirsch, *Technion—Israel Institute of Technology, Israel* (41, 3, p. 504) Article
- J03-064 Axial Passive Damping Testing of Mass-Produced Stress Coupled, Cured Damped Composites.** Angela Trego and Christopher Davis, *Boeing Phantom Works*; and Paul F. Eastman, *Brigham Young University* (41, 3, p. 512) Article
- J03-065 Imperfection Sensitivity of Conical Shells.** Yiska Goldfeld, *Technion-Israel Institute of Technology, Israel*; Izhak Sheinman, *Technion-Israel Institute of Technology, Israel*; and Menahem Baruch, *Technion—Israel Institute of Technology, Israel* (41, 3, p. 517) Article
- J03-066 New Approximate Formulas for Viscosity and Thermal Conductivity of Dilute Gas Mixtures.** Drew A. Copeland, *The Boeing Company* (41, 3, p. 525) Article
- J03-067 Acoustic and Entropy Pulses Created in Duct Flows by Rapid Local Events.** Miklos Sajben, *University of Cincinnati* and Gary L. Cole and John W. Slater, *NASA John H. Glenn Research Center* (41, 3, p. 538) Technical Note
- J03-068 Vortex Shedding and Transition Frequencies Associated with Flow Around a Circular Cylinder.** N. A. Ahmed and D. J. Wagner, *University of New South Wales, Australia* (41, 3, p. 542) Technical Note
- J03-069 Vortex Breakdown-Tail Interaction.** Y. Kim, M. Ozgoren, and D. Rockwell, *Lehigh University* (41, 3, p. 544) Technical Note
- J03-070 Autonomous Gain-Phase Tailoring of Rotational Acceleration Rate Sensors.** Yu-Hsiang Hsu and Chih-Kung Lee, *National Taiwan University, Republic of China* (41, 3, p. 549) Technical Note

J03-071 Assessment of Delamination Fracture Load of Stringer Stiffened Composite Panel. R. Ramesh Kumar, K. S. Praveen, and G. Venkateswara, *Vikram Sarabhai Space Center, India* (41, 3, p. 551) Technical Note

J03-072 Finite Element Model Updating for Helicopter Rotor Blade Using Genetic Algorithm. Veerabhadra Rao Akula and Ranjan Ganguli, *Indian Institute of Science, India* (41, 3, p. 554) Technical Note

J03-073 Golinski's Speed Reducer Problem Revisited. Tapabrata Ray, *National University of Singapore, Singapore* (41, 3, p. 556) Technical Note

J03-074 Debate Concerning the Mean-Velocity Profile of a Turbulent Boundary Layer. Matthias H. Buschmann, *Technische Universität Dresden, Germany*; and Mohamed Gad-el-Hak, *Virginia Commonwealth University* (41, 4, p. 565) Article

J03-075 Lessons from LESFOIL Project on Large-Eddy Simulation of Flow Around an Airfoil. Christopher P. Mellen, Jochen Fröhlich and Wolfgang Rodi, *University of Karlsruhe, Germany* (41, 4, p. 573) Article based on AIAA Paper 2002-0111

J03-076 Accurate Multiblock Navier-Stokes Solver for Complex Aerodynamic Configurations. B. Epstein, *Academic College of Tel-Aviv-Yaffo, Israel*; and T. Rubin and S. Séror, *Israel Aircraft Industries, Israel* (41, 4, p. 582) Article

J03-077 Grid Convergence Error Analysis for Mixed-Order Numerical Schemes. Christopher J. Roy, *Sandia National Laboratories, USA* (41, 4, p. 595) Article

J03-078 Computational Simulation of the Autonomous Navigation of a Biomimetic Underwater Vehicle. Samuel F. Galls and Othon K. Rediniotis, *Texas A&M University* (41, 4, p. 605) Article

J03-079 Throat Heating Effect on Critical Roughness and Nozzle Wall Boundary-Layer Stability. R. -S. Lin, V. Iyer, and M. R. Malik, *High Technology Corporation* (41, 4, p. 612) Article

J03-080 Passive Mixing Control via Lobed Injectors in High-Speed Flow. A. J. Majamaki, O. I. Smith, and A. R. Karagozian, *University of California* (41, 4, p. 623) Article

J03-081 Plasma Study on the Ionization of Flowing Gases by Direct Current Electric Discharge. Stelu Deaconu, Hugh W. Coleman, and S. T. Wu, *University of Alabama in Huntsville* (41, 4, p. 633) Article

J03-082 Toward a Flame Embedding Model for Turbulent Combustion Simulation. Y. M. Marzouk and A. F. Ghoniem, *Massachusetts Institute of Technology*; and H. N. Najm, *Sandia National Laboratories* (41, 4, p. 641) Article based on AIAA Paper 2000-0866

J03-083 Low-Mach-Number Preconditioning Applied to Turbulent Helicopter Fuselage Flowfield Computation. Vincent Gleize, and Michel Costes, *ONERA, France* (41, 4, p. 653) Article

J03-084 Two-Dimensional Model for Simulating Shock-Wave Interaction with Rigid Porous Materials. G. Malamud, D. Levi-Hevroni, and A. Levy, *Ben-Gurion University of the Negev, Israel* (41, 4, p. 663) Article

J03-085 Trapped Vortex in Ground Effect. Darwin L. Garcia and Joseph Katz, *San Diego State University* (41, 4, p. 674) Article

J03-086 Dual-Pump Coherent Anti-Stokes Raman Scattering Temperature and CO₂ Concentration Measurements. Robert P. Lucht and Viswanathan Velur-Natarajan, *Texas A&M University*; Campbell D. Carter, Keith D. Grinstead, and Jr., *Innovative Scientific Solutions Inc.*; James R. Gord, *U.S. Air Force Research Laboratory*; and Paul M. Danehy, *The Australian National University, Australia*; G. J. Fiechtner and Roger L. Farrow, *Sandia National Laboratories* (41, 4, p. 679) Article

J03-087 Evolutionary Optimization of Computationally Expensive Problems via Surrogate Modeling. Yew S. Ong, Prasanth B. Nair, and Andrew J. Keane, *University of Southampton, England, UK* (41, 4, p. 687) Article

J03-088 Full-Field Three-Dimensional Volume Vibrations for Piezoceramic Materials in Resonance. Chien-Ching Ma, *National Taiwan University, Taiwan, ROC*; Chi-Hung Huang, *Ching Yun Institute of Technology, Taiwan, ROC*; Hsien-Yang Lin, *De Lin Institute of Technology, Taiwan, ROC*; and Chan-Chian Lin, *National Taiwan University, Taiwan, ROC* (41, 4, p. 697) Article

J03-089 Effective Coefficients of Piezoelectric Fiber Reinforced Composites. Nilanjan Mallik and M. C. Ray, *Indian Institute of Technology, India* (41, 4, p. 704) Article

J03-090 Energy-Recycling Semi-Active Method for Vibration Suppression with Piezoelectric Transducers. Junjiro Onoda, *Institute of Space and Astronautical Science, Japan*; Kanjuro Makihara, *University of Tokyo, Japan*; and Kenji Minesugi, *The Institute of Space and Astronautical Science, Japan* (41, 4, p. 711) Article

J03-091 Transient Analysis of Anisotropic Multilayered Media Subjected to Dynamic Antiplane Loadings. Yi-Shyong Ing and Chih-Chung Chen, *Tamkang University, Taiwan, ROC* (41, 4, p. 720) Article

J03-092 Neural Networks for Inverse Problems in Damage Identification and Optical Imaging. Yong Y. Kim and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (41, 4, p. 732) Article

J03-093 Experimental Study of Corotating Wake-Vortex Merger at Reynolds Numbers of Order 10⁵. R. L. Bristol, J. M. Ortega, and Ö. Savaş, *University of California at Berkeley* (41, 4, p. 741) Technical Note

J03-094 Reynolds-Number Correlations for Separation of Turbulent Boundary Layers. V. A. Sandborn, *Colorado State University* (41, 4, p. 744) Technical Note

J03-095 Contribution to the Understanding of Flow Interactions Between Multiple Synthetic Jets. Mark Watson, Artur J. Jaworski, and Norman J. Wood, *University of Manchester, England, UK* (41, 4, p. 747) Technical Note

J03-096 Heat Flux Gage Studies of Compressible Dynamic Stall. M. S. Chandrasekhara, *Naval Postgraduate School*; and M. C. Wilder, *NASA Ames Research Center* (41, 5, p. 757) Article based on AIAA Paper 2002-0291

J03-097 Efficient and Robust Reynolds-Stress Model Computation of Three-Dimensional Compressible Flows. J. C. Chassaing and G. A. Gerolymos, and I. Vallet, *Université Pierre-et-Marie-Curie, France* (41, 5, p. 763) Article

J03-098 Toroidal Plasma Thruster for Deep Space Flights. N. N. Gorelenkov and L. E. Zakharov, *Princeton University*; and M. V. Gorelenkova, *Troitsk Institute for Innovative and Thermonuclear Research, Russia* (41, 5, p. 774) Article

J03-099 Velocity Measurements in a Three-Dimensional Compressible Base Flow. Brad A. Boswell, *Sandia National Laboratories*; and J. Craig Dutton, *University of Illinois at Urbana-Champaign* (41, 5, p. 785) Article based on AIAA Paper 2002-0292

J03-100 Helmholtz Resonator Impedance Model, Part I: Nonlinear Behavior. A. S. Hersh, B. E. Walker, and J. W. Celano, *Hersh Walker Acoustics* (41, 5, p. 795) Article

J03-101 Application of Vorticity Confinement to Prediction of the Flow over Complex Bodies. Y. Wenren, *Flow Analysis, Inc.*; and M. Fan, L. Wang, M. Xiao, and J. Steinhoff, *University of Tennessee Space Institute* (41, 5, p. 809) Article

J03-102 Preconditioning Method for Low Speed Flows. Vittorio Puoti, *Centro Italiano Ricerche Aerospaziali, Italy* (41, 5, p. 817) Article

J03-103 Low-Reynolds-Number Turbulent Flows in Locally Constricted Conduits: A Comparison Study. Zhe Zhang and Clement Kleinstreuer, *North Carolina State University* (41, 5, p. 831) Article

J03-104 Kinetic Equation for Particle Transport and Heat Transfer in Nonisothermal Turbulent Flows. R. V. R. Pandya and F. Mashayek, *University of Illinois at Chicago* (41, 5, p. 841) Article

J03-105 LSENS: A Multipurpose Kinetics and Sensitivity Analysis Code for Homogeneous Gas-Phase Reactions. K. Radhakrishnan, *Institute for Computational Mechanics in Propulsion* (41, 5, p. 848) Article

J03-106 Soot Surface Growth in Laminar Hydrocarbon/Air Diffusion Flames. A. M. El-Leathy, F. Xu, C. H. Kim, and G. M. Faeth, *University of Michigan* (41, 5, p. 856) Article

J03-107 Application of Proper Orthogonal Decomposition to a Supersonic Axisymmetric Jet. E. Caraballo, M. Samimy, and J. Scott, *The Ohio State University*; S. Narayanan, *United Technologies Research Center*; and J. DeBonis, *NASA John H. Glenn Research Center at Lewis Field* (41, 5, p. 866) Article

J03-108 Prediction of Lobed Mixer Vortical Structures with a $k-\epsilon$ Turbulence Model. Hayder Salman, Gary J. Page, and James J. McGuirk, *Loughborough University, England, UK* (41, 5, p. 878) Article

J03-109 Axisymmetric Swirling Vortical Wakes Modulated by a Control Disk. R. F. Huang and S. C. Yen, *National Taiwan University of Science and Technology, Republic of China* (41, 5, p. 888) Article

J03-110 Convergence Properties of Analytical Target Cascading. Nestor Michelena, *University of Michigan*; Hyungju Park, *Oakland University*; and Panos Y. Papalambros, *University of Michigan* (41, 5, p. 897) Article

J03-111 Pressure-Correction Method for Low-Speed Pressure-Sensitive Paint Measurements. Tianshu Liu, *NASA Langley Research Center* (41, 5, p. 906) Article

J03-112 Experimental Verification of a Test-Based Hybrid Component Mode Synthesis Approach. Y. Soucy, *Canadian Space Agency, Canada*; and J. L. Humar, *Carleton University, Canada* (41, 5, p. 912) Article

J03-113 Analysis of Sandwich Plates with Viscoelastic Damping Using Two-Dimensional Plate Modes. Gang Wang and Norman M. Wereley, *University of Maryland*; and Der-Chen Chang, *Georgetown University* (41, 5, p. 924) Article based on AIAA Paper 2002-1366

J03-114 Influence of Contact Phenomena on Embedded Delaminations Growth in Composites. Aniello Riccio, *Centro Italiano Ricerche Aerospaziali, Italy*; Francesco Scaramuzzino, *Seconda Università degli Studi di Napoli, Italy*; and Pierluigi Perugini, *Centro Italiano Ricerche Aerospaziali, Italy* (41, 5, p. 933) Article

J03-115 Efficient Higher-Order Shell Theory for Laminated Composites with Multiple Delaminations. Jun-Sik Kim, *Inha University, Republic of Korea*; and Maenghyo Cho, *Seoul National University, Republic of Korea* (41, 5, p. 941) Article based on AIAA Paper 2000-1400

J03-116 Symmetric State-Space Method for a Class of Nonviscously Damped Systems. N. Wagner, *University of Stuttgart, Germany*; and S. Adhikari, *University of Cambridge, England, UK* (41, 5, p. 951) Article

J03-117 Force Method Revisited. Ramin Sedaghati, Afzal Suleman, *Concordia University, Canada* (41, 5, p. 957) Article

J03-118 Retarded-Time Calculation for Moving Sources. Michael Carley, *University of Bath, England, UK* (41, 5, p. 967) Technical Note

J03-119 Estimation of the Flowfield from Surface Pressure Measurements in an Open Cavity. Nathan E. Murray and Lawrence S. Ukeiley, *University of Mississippi* (41, 5, p. 969) Technical Note based on AIAA Paper 2002-2866

J03-120 Control of a Plane Jet by Fluidic Wall Pulsing. J. C. Béra, *Ecole Centrale de Lyon, France*; M. Ben Chiekh, *Ecole Nationale d'Ingénieurs de Monastir, France*; and M. Michard, G. Comte-Bellot, and M. Sunyach, *Ecole Centrale de Lyon, France* (41, 5, p. 972) Technical Note

J03-121 Local Coordinate Approach in Meshless Local Petrov-Galerkin Method for Beam Problems. I. S. Raju, *NASA Langley Research Center*; and D. R. Phillips, *Joint Institute for Advancement of Flight Science—George Washington University* (41, 5, p. 975) Technical Note

J03-122 The Wright Brothers: First Aeronautical Engineers and Test Pilots. F. E.C. Culick, *California Institute of Technology* (41, 6, p. 985) Survey Paper

J03-123 Aerodynamics of a Double-Element Wing in Ground Effect. Xin Zhang and Jonathan Zerihan, *University of Southampton, England, UK* (41, 6, p. 1007) Article

J03-124 Turbulent Dissipation-Rate Equation for Compressible Flows. Krishnendu Sinha and Graham V. Candler, *University of Minnesota* (41, 6, p. 1017) Article

J03-125 Bursting Frequency Predictions for Compressible Turbulent Boundary Layers. William W. Liou and Yichuan Fang, *Western Michigan University* (41, 6, p. 1022) Article based on AIAA Paper 2002-0576

J03-126 Nonequilibrium Turbulent-Viscosity Model for Supersonic Free-Shear Layer/Wall-Bounded Flows. Akira Yoshizawa, *University of Tokyo, Japan*; Hitoshi Fujiwara, *National Aerospace Laboratory, Japan*; Fujihiro Hamba and Shoji Nisizima, *University of Tokyo, Japan*; and Yukihiro Kumagai, *Japan Meteorological Agency, Japan* (41, 6, p. 1029) Article

J03-127 PEGASUS 5: An Automated Preprocessor for Overset-Grid Computational Fluid Dynamics. Stuart E. Rogers, *NASA Ames Research Center*; Norman E. Suhs, *U.S. Army*; and William E. Dietz, *Flow Analysis, Inc.* (41, 6, p. 1037) Article based on AIAA Paper 2002-3186

J03-128 Numerical Study of Wind-Tunnel Walls Effects on Transonic Airfoil Flow. Andrey Garbaruk, Mikhail Shur, and Mikhail Strelets, *St. Petersburg State Technical University, Russia*; and Philippe R. Spalart, *The Boeing Company, Russia* (41, 6, p. 1046) Article

J03-129 Navier-Stokes and Direct Simulation Monte Carlo Predictions for Laminar Hypersonic Separation. Christopher J. Roy, and Michael A. Gallis, Timothy J. Bartel, and Jeffrey L. Payne, *Sandia National Laboratories* (41, 6, p. 1055) Article

J03-130 Stochastic Inlet Conditions for Large Eddy Simulation of a Fully-Turbulent Jet. David J. Glaze and Steven H. Frankel, *Purdue University* (41, 6, p. 1064) Article based on AIAA Paper 2001-2548

J03-131 Numerical Study of Mixing Enhancement by Shock Waves in Model Scramjet Engine. Ji-Ho Kim, Youngbin Yoon, and In-Seuck Jeung, *Seoul National University, Korea*; Hwanil Huh, *Chungnam National University, Korea*; and Jeong-Yeol Choi, *Pusan National University, Korea* (41, 6, p. 1074) Article

J03-132 Characterisation of Aircraft Wake Vortices by Multiple-Lidar Triangulation. Friedrich Köpp, Igor Smalikho, and Stephan Rahm, *DLR, German Aerospace Research Center, Germany*; Agnes Dolfi and Jean-Pierre Cariou, *ONERA, France*; and Michael Harris, Robert I. Young, Kevin Weekes, and Neil Gordon, *QinetiQ Malvern, England, UK* (41, 6, p. 1081) Article

J03-133 System Design Through Subsystem Selection Using Physical Programming. Mitul Patel and Kemper E. Lewis, *State University of New York at Buffalo*; and Aniela Maria and Achille Messac, *Rensselaer Polytechnic Institute* (41, 6, p. 1089) Article

J03-134 Wide-Temperature Electronically Scanned Pressure Measurement Module. Frederico R. Garza, *Swales Aerospace, Inc.*; and Allan J. Zuckerwar, Qamar A. Shams, Purnell Hopson, and Jr., *NASA Langley Research Center* (41, 6, p. 1097) Article

J03-135 Approximate Modal Identification of Lightly Damped, Highly-Symmetric Bladed Disks. S. J. DiMaggio and Z. H. Duron, *The Aerospace Corporation*; and G. Davis, *The Boeing Company* (41, 6, p. 1105) Article based on AIAA Paper 2002-1225

J03-136 Dynamic Substructuring in the Medium-Frequency Range. C. Soize, *Université de Marne-la-Vallée, France*; and S. Mziou, *ONERA, France* (41, 6, p. 1113) Article

J03-137 Nonlinear Vibrations of Circular Cylindrical Shells with Different Boundary Conditions. Marco Amabili, *Università di Parma, Italy* (41, 6, p. 1119) Article

J03-138 Geometrically Exact, Intrinsic Theory for Dynamics of Curved and Twisted Anisotropic Beams. Dewey H. Hodges, *Georgia Institute of Technology* (41, 6, p. 1131) Article

J03-139 Effects of Causality and Joint Conditions on Method of Reverberation-Ray Matrix. Ji-Feng Chen, *National Chiao-Tung University, Republic of China*; and Yih-Hsing Pao, *National Taiwan University, Republic of China* (41, 6, p. 1138) Article

J03-140 Multiple-Timescale Analysis for Bifurcation from a Multiple-Zero Eigenvalue. Angelo Luongo and Angelo Di Egidio, *University di L'Aquila, Italy*; and Achille Paolone, *University of Rome "La Sapienza", Italy* (41, 6, p. 1143) Article

J03-141 Optimal Control of Laminated Shells Using Piezoelectric Sensor and Actuator Layers. M. C. Ray, *Indian Institute of Technology, India* (41, 6, p. 1151) Article

J03-142 Computational Modeling of Damage Growth in Composite Laminates. Shiladitya Basu and Anthony M. Waas, *University of Michigan*; and Damodar R. Ambur, *NASA Langley Research Center* (41, 6, p. 1158) Article

J03-143 Corrosion Fatigue Through Particle Swarm Optimization. R. M. Pidaparti and S. Jayanti, *Indiana University-Purdue University at Indianapolis* (41, 6, p. 1167) Article

J03-144 Postbuckling of Stiffened Panels Using Strut, Strip, and Finite Element Methods. M. Lillico, R. Butler, and G. W. Hunt, *University of Bath, England, UK*; and A. Watson and D. Kennedy, *Cardiff University, England, UK* (41, 6, p. 1172) Article based on AIAA Paper 2001-1329

J03-145 Continuum Topology Optimization of Buckling-Sensitive Structures. Salam Rahmatalla and Colby C. Swan, *University of Iowa* (41, 6, p. 1180) Article

J03-146 Concept Selection Using s-Pareto Frontiers. Christopher A. Mattson and Achille Messac, *Rensselaer Polytechnic Institute* (41, 6, p. 1190) Article

J03-147 Effects of Ramp Side Angle in Supersonic Mixing. T. M. Abdel-Salam, S. N. Tiwari, and T. O. Mohieldin, *Old Dominion University* (41, 6, p. 1199) Technical Note

J03-148 Irregular Phenomena of Shock Reflection Transition in a Conventional Supersonic Wind Tunnel. Norikazu Sudani, Mamoru Sato, Toshio Karasawa, Hiroshi Kanda, and Nobuhiro Toda, *National Aerospace Laboratory of Japan, Japan* (41, 6, p. 1201) Technical Note

- J03-149 Is There a Difference Between Aeroacoustics and Aerodynamics? An Aeroelastician's Viewpoint.** Luigi Morino, *Università degli Studi di Roma "Roma Tre", Italy* (41, 7, p. 1209) Article
- J03-150 Some Advanced Concepts in Discrete Aerodynamic Sensitivity Analysis.** Arthur C. Taylor and III, *Old Dominion University*; Lawrence L. Green and Perry A. Newman, *NASA Langley Research Center*; and Michele M. Putko, *Old Dominion University*; (41, 7, p. 1224) Article
- J03-151 Bubble Bursting and Stall Hysteresis on a Single Slotted Flap High-Life Configuration.** M. Baragona, L. M. M. Boermans, M. J. L. van Tooren, H. Bijl, and A. Beukers, *Delft University of Technology, The Netherlands* (41, 7, p. 1230) Article
- J03-152 Beamforming Algorithm for Distributed Source Localization and its Application to Jet Noise.** Saligrama R. Venkatesh, *Boston University*; and David R. Polak and Satish Narayanan, *United Technologies Research Center* (41, 7, p. 1238) Article
- J03-153 Noise Characteristics of Aircraft High Lift Systems.** Y. P. Guo and M. C. Joshi, *The Boeing Company, USA* (41, 7, p. 1247) Article
- J03-154 Optimal Transpiration Boundary Control for Aeroacoustics.** S. Scott Collis, Kaveh Ghayour, and Matthias Heinkenschloss, *Rice University* (41, 7, p. 1257) Article based on AIAA Paper 2002-2757
- J03-155 Numerical Study of Detailed Flow Affecting a Direct Measuring Skin Friction Gage.** Matthew MacLean and Joseph A. Schetz, *Virginia Polytechnic Institute and State University, USA* (41, 7, p. 1271) Article
- J03-156 Experimental Investigation of High Enthalpy Effects on Attachment-Line Boundary Layer Transition.** Keisuke Fujii, *National Aerospace Laboratory, Japan*; and Hans G. Hornung, *California Institute of Technology* (41, 7, p. 1282) Article
- J03-157 Grid-Averaged Lagrangian Equations of Dispersed Phase in Dilute Two-Phase Flow.** Keh-Chin Chang, Jinn-Cherng Yang, and Muh-Rong Wang, *National Cheng-Kung University, Taiwan, Republic of China* (41, 7, p. 1292) Article
- J03-158 Titan IVB Linear-Shaped Charge Assembly Explosive Train Transfer Reliability.** Lien C. Yang and Ian P.H. Do, *Northrop Grumman Mission Systems Sector* (41, 7, p. 1304) Article based on AIAA Paper 2001-3220
- J03-159 Improved Turbulent Boundary-Layer Model for Shock Tubes.** Eric L. Petersen, *University of Central Florida*; and Ronald K. Hanson, *Stanford University*; (41, 7, p. 1314) Article
- J03-160 Hydroxyl Formation Mechanisms and Models in High-Altitude Hypersonic Flows.** N. E. Gimelshein and D. A. Levin, *Pennsylvania State University*; and S. F. Gimelshein, *George Washington University* (41, 7, p. 1323) Article
- J03-161 Properties of Particle-Generated Turbulence in the Final-Decay Period.** K. Lee and G. M. Faeth, *University of Michigan*; and J.-H. Chen, *National Cheng-Kung University, Taiwan, ROC* (41, 7, p. 1332) Article based on AIAA Paper 2003-1164
- J03-162 Shock/Vortex Interactions Induced by Blast Waves.** S.-M. Liang and C.-P. Lo, *National Cheng-Kung University, Taiwan, ROC* (41, 7, p. 1341) Article
- J03-163 Control of Supersonic Impinging Jet Flows Using Supersonic Microjets.** F. S. Alvi, C. Shih, R. Elavarasan, G. Garg, and A. Krothapalli, *Florida A&M University and Florida State University* (41, 7, p. 1356) Article
- J03-164 Two Benchmarks to Assess Two-Dimensional Theories of Sandwich, Composite Plates.** E. Carrera and L. Demasi, *Politecnico di Torino, Italy* (41, 7, p. 1356) Article
- J03-165 Nonlinear Asymmetric Dynamic Buckling of Isotropic/Laminated Orthotropic Spherical Caps.** M. Ganapathi, S. S. Gupta, and B. P. Patel, *Institute of Armament Technology, India* (41, 7, p. 1363) Article
- J03-166 Damage Assessment of a Nonlinear Space Antenna Structure Using Quasi-Linearization Methods.** William B. Dunbar, *California Institute of Technology*; and J. B. Kosmatka, *University of California, USA* (41, 7, p. 1370) Article
- J03-167 Structural Dynamic Frequency Response Using Combined Direct and Adjoint Reduced-Order Approximations.** Eli Livne, *University of Washington*; and Guillermo D. Blando, *General Atomics Aeronautical Systems, Inc.*, (41, 7, p. 1377) Article
- J03-168 Impact of Axial Vortices on Mixing at a High Convective Mach Number.** Bernard Parent and Jean P. Sislian, *University of Toronto, Canada* (41, 7, p. 1386) Technical Note
- J03-169 Feedback Control of a Cylinder Wake Low-Dimensional Model.** Kelly Cohen, Stefan Siegel, Thomas McLaughlin, and Eric Gillies, *U.S. Air Force Academy* (41, 7, p. 1389) Technical Note
- J03-170 A Mechanism for Flame Acceleration in Narrow Tubes.** James D. Ott, *Combustion Research and Flow Technology*; Elaine S. Oran, *U.S. Naval Research Laboratory*; and John D. Anderson and Jr., *National Air and Space Museum* (41, 7, p. 1391) Technical Note
- J03-171 Restatement of the Spalart-Allmaras Eddy-Viscosity Model in Strain-Adaptive Formulation.** T. Rung, U. Bunge, M. Schatz, and F. Thiele, *Technical University of Berlin, Germany* (41, 7, p. 1396) Technical Note
- J03-172 Problems of the Transoceanic Airplane.** I. I. Sikorsky, *Sikorsky Aircraft* (41, 7A, p. 1) Article
- J03-173 Airfoil Theory for Non-Uniform Motion.** Th. Von Kármán and W. R. Sears, *California Institute of Technology* (41, 7A, p. 5) Article
- J03-174 Some Aspects of Non-Stationary Airfoil Theory and Its Practical Application.** William R. Sears, *California Institute of Technology* (41, 7A, p. 17) Article
- J03-175 The Design of High-Speed Military Airplanes.** Clarence L. Johnson, *Lockheed Aircraft Corporation* (41, 7A, p. 22) Article
- J03-176 Three-Dimensional Wing Flutter Analysis.** Alexander H. Flax, *Curtis-Wright Corporation* (41, 7A, p. 30) Article

- J03-177 The Drag Problem at High Supersonic Speeds.** Adolf Busemann, *National Advisory Committee for Aeronautics* (41, 7A, p. 37) Article
- J03-178 Our Heritage from Wilbur and Orville Wright.** Hugh L. Dryden, *National Advisory Committee for Aeronautics* (41, 7A, p. 45) History/Lecture
- J03-179 Turbulence and Skin Friction.** Th. Von Kármán, *California Institute of Technology* (41, 7A, p. 47) Article
- J03-180 The Fundamentals of the Statistical Theory of Turbulence.** Th. Von Kármán, *California Institute of Technology* (41, 7A, p. 67) Article
- J03-181 The Theory of Isotropic Turbulence.** Hugh L. Dryden, *National Advisory Committee for Aeronautics* (41, 7A, p. 75) Article
- J03-182 The Statistical Theory of Isotropic Turbulence.** G. I. Taylor, *Royal Society, England, UK* (41, 7A, p. 83) Article
- J03-183 Laminar Boundary-Layer Oscillations and Stability of Laminar Flow.** G. B. Schubauer and H. K. Skramstad, *National Bureau of Standards* (41, 7A, p. 88) Article
- J03-184 Supersonic Aerodynamics—Principles and Applications.** Theodore von Kármán, (41, 7A, p. 98) History/Lecture
- J03-185 Methods for Predicting Phenomena in the High-Speed Flow of Gases.** M. J. Lighthill, *Royal Aircraft Establishment, England, UK* (41, 7A, p. 128) Article
- J03-186 Applications of the Theory of Free Molecule Flow to Aeronautics.** Holt Ashley, *Massachusetts Institute of Technology* (41, 7A, p. 143) Article
- J03-187 Temperature and Velocity Profiles in the Compressible Laminar Boundary Layer with Arbitrary Distribution of Surface Temperature.** Dean R. Chapman and Morris W. Rubesin, *Ames Aeronautical Laboratory* (41, 7A, p. 153) Article
- J03-188 The Laminar-Turbulent Transition in a Boundary Layer—Part I.** H. W. Emmons, *Harvard University* (41, 7A, p. 172) Article
- J03-189 A Mixing Theory for the Interaction Between Dissipative Flows and Nearly Isentropic Streams.** Robert T. Jones, *Ames Aeronautical Laboratory, N.A.C.A.* (41, 7A, p. 181) Article
- J03-190 Theoretical Determination of the Minimum Drag of Airfoils at Supersonic Speeds.** Robert T. Jones, *Ames Aeronautical Laboratory, N.A.C.A.* (41, 7A, p. 209) Article
- J03-191 Turbulence in Supersonic Flow.** Leslie S. Kováznay, *The Johns Hopkins University* (41, 7A, p. 219) Article
- J03-192 Turbulent Boundary Layers in Adverse Pressure Gradients.** F. H. Clauser, *The John Hopkins University* (41, 7A, p. 238) Article
- J03-193 Engineering Relations for Friction and Heat Transfer to Surfaces in High Velocity Flow.** E.R.G. Eckert, *University of Minnesota* (41, 7A, p. 256) Technical Comment/Readers Forum
- J03-194 On Turbulent Flow Near a Wall.** E.R. van Driest, *North American Aviation* (41, 7A, p. 259) Article
- J03-195 The Supersonic Blunt-Body Problem—Review and Extension.** Milton D. Van Dyke, *Ames Aeronautical Laboratory, NACA* (41, 7A, p. 265) Article
- J03-196 Observation of High Intensity Radiation by Satellites 1958 Alpha and Gamma.** J. A. van Allen, G. H. Ludwig, E. C. Ray, and C. E. McIlwain, *State University of Iowa* (41, 7A, p. 277) Article
- J03-197 Jet Noise.** M. J. Lighthill, *Royal Aircraft Establishment, England, UK* (41, 7A, p. 282) Article
- J03-198 Stability Theory for a Pair of Trailing Vortices.** S. C. Crow, *The Boeing Company* (41, 7A, p. 293) Article
- J03-199 Calculation of Plane Steady Transonic Flows.** Earl M. Murman and Julian D. Cole, *Boeing Scientific Research Laboratories* (41, 7A, p. 301) Article
- J03-200 Structure of Turbulent Shear Flows: A New Look.** Anatol Roshko, *California Institute of Technology* (41, 7A, p. 309) Article
- J03-201 An Implicit Factored Scheme for the Compressible Navier-Stokes Equations.** Richard M. Beam and R. F. Warming, *NASA Ames Research Center* (41, 7A, p. 318) Article
- J03-202 A Numerical Method for Solving the Equations of Compressible Viscous Flow.** R. W. McCormack, *NASA Ames Research Center* (41, 7A, p. 328) Article
- J03-203 A Theory of Unstable Combustion in Liquid Propellant Rocket Systems.** Martin Summerfield, *Princeton University* (41, 7A, p. 335) Article
- J03-204 High-Frequency Combustion Instability in Rocket Motor with Concentrated Combustion.** Luigi Crocco and Sin-I Cheng, *Princeton University* (41, 7A, p. 342) Article
- J03-205 Laminar Heat Transfer Over Blunt-Nosed Bodies at Hypersonic Flight Speeds.** Lester Lees, *The Ramo-Wooldridge Corporation and California Institute of Technology* (41, 7A, p. 356) Article
- J03-206 Buckling of Thin-Walled Circular Cylinders Under Axial Compression and Internal Pressure.** Y. C. Fung and E. E. Sechler, *The Ramo-Wooldridge Corporation and California Institute of Technology* (41, 7A, p. 367) Article
- J03-207 Theory of Stagnation Point Heat Transfer in Dissociated Air.** J. A. Fay and F. R. Riddell, *Avco Research Laboratory* (41, 7A, p. 373) Article
- J03-208 Airfoil Flow Visualization and Pressure Measurements in High-Reynolds-Number Transonic Flow.** Herbert Olivier, Thomas Reichel and Mitja Zechner, *RWTH Aachen University, Germany* (41, 8, p. 1405) Article

J03-209 Nonaxisymmetrical Fuselage Shape Modification for Drag Reduction of Low Sonic-Boom Airplane. Yoshikazu Makino, Ken'ichiro Suzuki, Masayoshi Noguchi, and Kenji Yoshida, *National Aerospace Laboratory, Japan* (41, 8, p. 1413) Article based on AIAA Paper 2003-557

J03-210 Scaling of Icing Tests: A Review of Recent Progress. R. J. Kind, *Carleton University, Canada* (41, 8, p. 1421) Article based on AIAA Paper 2003-1216

J03-211 Development of Direct-Measuring Skin Friction Gauges for Hypersonic Flight Tests. Theodore B. Smith, Joseph A. Schetz, *Virginia Polytechnical Institute and State University*; and Trong T. Bui, *NASA Dryden Flight Research Center* (41, 8, p. 1429) Article based on AIAA Paper 2002-3134

J03-212 Ultrasound Technique for Prediction of Statistical Characteristics of Grid-Generated Turbulence. T. A. Andreeva and W. W. Durgin, *Worcester Polytechnic Institute* (41, 8, p. 1438) Article based on AIAA Paper 2002-0921

J03-213 Correlating Friction Velocity In Turbulent Boundary Layers Subjected To Freestream Turbulence. Michael J. Barrett, *Valparaíso University*; and D. Keith Hollingsworth, *University of Houston*, (41, 8, p. 1444) Article

J03-214 Large-Eddy Simulation of Supersonic Cavity Flowfields Including Flow Control. Donald P. Rizzetta, and Miguel R. Visbal, *U.S. Air Force Research Laboratory* (41, 8, p. 1452) Article based on AIAA Paper 2002-2853

J03-215 Hybrid Simulation Approach for Cavity Flows: Blending, Algorithm, and Boundary Treatment Issues. R. A. Baurle and C.-J. Tam, *Taitech, Inc.*; and J.R. Edwards and H.A. Hassan, *North Carolina State University* (41, 8, p. 1463) Article based on AIAA Paper 2001-2562

Erratum (41, 10, p.2079)

J03-216 Inflow Boundary Conditions for Hybrid Large Eddy/Reynolds Averaged Navier—Stokes Simulations. Xudong Xiao, J. R. Edwards, and H. A. Hassan, *North Carolina State University*; and R. A. Baurle, *Taitech, Inc.* (41, 8, p. 1481) Article based on AIAA Paper 2003-0079

J03-217 Sectional Flow Structures in Near Wake of Elevated Jets in a Crossflow. Rong F. Huang, and Ren H. Hsieh, *National Taiwan University of Science and Technology, Taiwan, ROC* (41, 8, p. 1490) Article

J03-218 Spring-Supported Cylinder Wake Control. M. M. Zhang, and Y. Zhou and L. Cheng, *The Hong Kong Polytechnic University, PRC* (41, 8, p. 1500) Article

J03-219 Curvature Effects in Burke—Schumann Spray Flame Extinction. J.B. Greenberg, and F. Grodek, *Technion—Israel Institute of Technology, Israel* (41, 8, p. 1507) Article based on AIAA Paper 2002-0623

J03-220 Surface Properties During Primary Breakup of Turbulent Liquid Jets in Still Air. K. A. Sallam and G. M. Faeth, *University of Michigan* (41, 8, p. 1514) Article

J03-221 Atomic Oxygen Degradation of Polymeric Thin Films in Low Earth Orbit. G. Allegri, S. Corradi, and M. Marchetti, *University of Rome "La Sapienza", Italy*; and V. Milinchuck, *Obninsk's Institute of Nuclear Power Engineering, Russia* (41, 8, p. 1525) Article

J03-222 Influence of Four Kinds of Gradient Magnetic Fields on a Hydrogen—Oxygen Flame. Eisuke Yamada, Masahisa Shinoda, Hiroshi Yamashita, and Kuniyuki Kitagawa, *Nagoya University, Japan* (41, 8, p. 1535) Article

J03-223 Optimal Streamwise Vortices Intended for Supersonic Mixing Enhancement. Anatoli Tumin, *University of Arizona* (41, 8, p. 1542) Article based on AIAA Paper 2002-0728

J03-224 Sandwich-Plate Vibration Analysis: Three-Layer Quasi-Three-Dimensional Finite Element Model. Airtón Nabarrete, *Centro Universitário Fundação Educacional Inaciana Pe Sabóia de Medeiros, Brazil*; Sergio Francino M. de Almeida, *Instituto Tecnológico de Aeronáutica, Brazil*; and Jørn S. Hansen, *University of Toronto, Canada* (41, 8, p. 1547) Article

J03-225 Vibration Testing and Finite Element Analysis of an Inflatable Structure. Gyuhae Park, Marion Sausse, and Daniel J. Inman, *Virginia Polytechnic Institute and State University*; and John A. Main, *University of Kentucky* (41, 8, p. 1556) Article

J03-226 Hypervelocity Impacts on Thin Metallic and Composite Space Debris Bumper Shields. Djameel Ramjaun, Ichiro Kato, and Kazuyoshi Takayama, *Tohoku University, Japan*; and Gopalan Jagadeesh, *Indian Institute of Science, India* (41, 8, p. 1564) Article

J03-227 Reliability-Based Structural Optimization of an Elastic-Plastic Beam. Mazen A. Ba-abbad and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University*; and Efstratios Nikolaidis, *University of Toledo* (41, 8, p. 1573) Article

J03-228 Particle Swarm Optimization. Gerhard Venter, *Vanderplaats Research and Development, Inc.*; and Jaroslav Sobieszcanski-Sobieski, *NASA Langley Research Center* (41, 8, p. 1583) Article

J03-229 Automated Generation of High-Order Partial Derivative Models. James D. Turner, *Amdyn Systems* (41, 8, p. 1590) Article

J03-230 Effect of Acoustic Excitation on Airfoil Performance at Low Reynolds Numbers. Serhiy Yarusevych, *University of Toronto, Canada*; John Gregory Kwall, *Ryerson University, Canada*; and Pierre Edward Sullivan, *University of Toronto, Canada* (41, 8, p. 1599) Technical Note

J03-231 Robust-Optimal Design of a Lightweight Space Structure Using a Genetic Algorithm. D. K. Anthony and A. J. Keane, *University of Southampton, England, UK* (41, 8, p. 1601) Technical Note

J03-232 Illustration of the Inclusion of Sound-Flow Interactions in Lighthill's Equation. Christophe Bogey, Xavier Glerfelt, and Christophe Bailly, *Ecole Centrale de Lyon, France* (41, 8, p. 1604) Article

J03-233 Effect of Artificial Dissipation on Large-Eddy Simulation with Deconvolution Modeling. R. von Kaenel, *ETH Zürich, Switzerland*; N. A. Adams, *Technical University of Dresden, Germany*; L. Kleiser, *ETH Zürich*; and J. B. Vos, *CFS Engineering SA, Switzerland* (41, 8, p. 1606) Technical Note

J03-234 The Accuracy of Higher Order Finite Difference Schemes on Nonuniform Grids. Yongmann M. Chung and Paul G. Tucker, *University of Warwick, England, UK* (41, 8, p. 1609) Technical Note

J03-235 Vibration-Dissociation Coupling Model for Hypersonic Blunt-Body Flow. Eswar Josyula, *U.S. Air Force Research Laboratory*; and William F. Bailey, *U.S. Air Force Institute of Technology* (41, 8, p. 1611) Technical Note based on AIAA Paper 2001-2733

J03-236 Laser Doppler Anemometry Study of a Turbulent Jet in Crossflow. Oktay Özcan, *Yildiz Technical University, Turkey*; and Poul Scheel Larsen, *Technical University of Denmark, Denmark* (41, 8, p. 1614) Technical Note

J03-237 Test Data Uncertainty Analysis Algorithm of NASA Ames Wind Tunnels. Norbert M. Ulbrich, *Sverdrup Technology Inc.*, (41, 8, p. 1616) Technical Note

J03-238 Rapid Scanning of Overheat Ratios Using a Constant Voltage Anemometer. Joseph D. Norris and Ndaona Chokani, *North Carolina State University* (41, 8, p. 1619) Technical Note

J03-239 Numerical Instability of Classical Free-Interface Component Mode Synthesis Techniques. Ronnie Bladh, Christophe Pierre and Matthew P. Castanier, *University of Michigan* (41, 8, p. 1621) Technical Note

J03-240 Development of Comprehensive Detailed and Reduced Reaction Mechanisms for Combustion Modeling. C. K. Law, *Princeton University*; C. J. Sung, *Case Western Reserve University*; H. Wang, *University of Delaware*; and T. F. Lu, *Princeton University* (41, 9, p. 1629) Survey based on AIAA Paper 2002-0331

J03-241 Computation Fluid Dynamics-Based Drag Prediction and Decomposition. Luigi Paparone, *Centro Italiano Ricerche Aerospaziali, Italy*; and Renato Tognaccini, *Università degli Studi di Napoli "Federico II", Italy* (41, 9, p. 1647) Article

J03-242 Nonlinear Response of Aeroservoelastic Systems Using Discrete State-Space Approach. P.C. Chen, and E. Sulaeman, *ZONA Technology, Inc.* (41, 9, p. 1658) Article

J03-243 Load Updating for Finite Element Models. Jeffrey M.K. Chock and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (41, 9, p. 1667) Article based on AIAA Paper 2002-1214

J03-244 Jet Aeroacoustic Testing: Issues and Implications. K. Viswanathan, *The Boeing Company* (41, 9, p. 1674) Article based on AIAA Paper 2002-0365

J03-245 Two-Dimensional "Poor Man's Navier-Stokes Equation" Model of Turbulent Flows. Tianliang Yang, J. M. McDonough and J. D. Jacob, *University of Kentucky* (41, 9, p. 1690) Article based on AIAA Paper 2002-2962

J03-246 Wall Pressure Fluctuations in a Turbulent Boundary Layer After Blowing or Suction. Joongnyon Kim, Kyoungyoun Kim and Hyung Jin Sung, *Korea Advanced Institute of Science and Technology, Korea* (41, 9, p. 1697) Article

J03-247 Adaptive Harmonic Balance Solutions to Euler's Equation. Raymond C. Maple, Paul I. King and Mark E. Oxley, *Air Force Institute of Technology* (41, 9, p. 1705) Article

J03-248 Trailing Edge Cavity Afterbodies for Linear Plug Nozzle Engines. Menko E. N. Wisse and Willem J. Bannink, *Delft University of Technology, The Netherlands* (41, 9, p. 1715) Article based on AIAA Paper 2001-1892

J03-249 Fluorescence Imaging of Rotational and Vibrational Temperature in a Shock-Tunnel Nozzle Flow. Philip C. Palma, Paul M. Danehy, and A. F. P. Houwing, *Australian National University, Australia* (41, 9, p. 1722) Article

J03-250 Turbulence Modeling Applied to Flow over a Sphere. George Constantinescu, Matthieu Chapelet, and Kyle D. Squires, *Arizona State University* (41, 9, p. 1733) Article

J03-251 Inverse-Imaging Method for Detection of a Vortex in a Channel. Takao Suzuki and Tim Colonius, *California Institute of Technology* (41, 9, p. 1743) Article

J03-252 Quality Assisted Multi-Objective Multidisciplinary Genetic Algorithms. S. Gunawan, S. Azarm, and J. Wu, *University of Maryland*; and A. Boyars, *U.S. Naval Surface Warfare Center* (41, 9, p. 1752) Article

J03-253 Particle Velocity on Solid-Propellant Surface Using X-Ray Real-Time Radiography. Yumin Xiao, R. S. Amano, *University of Wisconsin-Milwaukee*; and Timin Cai, Jiang Li, and Guoqiang He, *Northwestern Polytechnical University* (41, 9, p. 1763) Article based on AIAA Paper 2001-1096

J03-254 Dynamic Analysis of Composite Laminates with Multiple Delamination Using Improved Layerwise Theory. Heung Soo Kim, Aditi Chattopadhyay, and Anindya Ghoshal, *Arizona State University* (41, 9, p. 1771) Article

J03-255 Frequency Optimization with Respect to Lumped Mass Position. D. Wang, and J.S. Jiang and W.H. Jhang, *Northwestern Polytechnical University, PRC* (41, 9, p. 1780) Article

J03-256 Micromechanics-Based Modeling of Woven Polymer Matrix Composites. Brett A. Bednarczyk, *University of Virginia*; and Steven M. Arnold, *NASA John H. Glenn Research Center at Lewis Field* (41, 9, p. 1788) Article based on AIAA Paper 2001-1567

J03-257 Asymptotic Finite Elements Introducing the Method of Integral Multiple Scales. James W. Rogers and Jr., *U.S. Air Force Research Laboratory*; and Gregory S. Agnes, *Air Force Institute of Technology* (41, 9, p. 1797) Article

J03-258 New Stochastic Algorithm for Design Optimization. Fabiano Luis de Sousa and Fernando Manuel Ramos, *Instituto Nacional de Pesquisas Espaciais, Brazil*; Pedro Paglione, and Roberto M. Girardi, *Instituto Tecnológico de Aeronáutica, Brazil* (41, 9, p. 1808) Article

J03-259 Functionally Graded Cylindrical Shell Thermal Instability Based on Improved Donnell Equations. R. Shahsiah, *Azad University, Iran*; and M. R. Eslami, *Amirkabir University of Technology, Iran* (41, 9, p. 1819) Article

J03-260 Velocity Spectrum Model for Turbulence Ingestion Noise From Computational-Fluid-Dynamics Calculations. Peter D. Lysak, and Timothy A. Brungart, *Pennsylvania State University* (41, 9, p. 1827) Technical Note

J03-261 Numerical Simulation of Shock Oscillations Over Airfoil Using a Wall Law Approach. E. Goncalves, and R. Houdeville, *ONERA, France* (41, 9, p. 1829) Technical Note based on AIAA Paper 2001-2857

J03-262 Onset of Condensation in Vortical Flow Over Sharp-Edged Delta Wing. Satoru Yamamoto, *Tohoku University, Japan* (41, 9, p. 1832) Technical Note based on AIAA Paper 2001-2651

J03-263 Trailing Vortices from a Wing with a Notched Lift Distribution. W.R. Graham, S-W Park, and T.B. Nickels, *University of Cambridge, England, UK* (41, 9, p. 1835) Technical Note

J03-264 Parametric Studies of the Whole Spacecraft Vibration Isolation. G. T. Zheng, *Beijing University of Aeronautics and Astronautics, PRC* (41, 9, p. 1839) Technical Note

J03-265 Optimal Design of the Optical Pickup Suspension Plates Using Topology Optimization. Gil Ho Yoon, and Yoon Young Kim, *Seoul National University, Korea* (41, 9, p. 1841) Technical Note

J03-266 Computational Aeroacoustics Time-Domain Method Coupled with Adaptive Noise Control Optimizer. Shi Zheng and Mei Zhuang, *Michigan State University* (41, 10, p. 1853) Article

J03-267 Statistical Model of Multicomponent-Fuel Drop Evaporation for Many-Drop Flow Simulations. K. G. Harstad, *Jet Propulsion Laboratory, California Institute of Technology*; P. C. Le Clercq, *California Institute of Technology*; and J. Bellan, *Jet Propulsion Laboratory, California Institute of Technology* (41, 10, p. 1858) Article

J03-268 Analysis of Subgrid-Scale Torque for Large-Eddy Simulation of Turbulence. J. S. Marshall and M. L. Beninati, *University of Iowa* (41, 10, p. 1875) Article

J03-269 Reynolds-Stress Model Dual-Time Stepping Computation of Unsteady Three-Dimensional Flows. J. C. Chassaing and G. A. Gerolymos, and I. Vallet, *Université Pierre-et-Marie-Curie, France* (41, 10, p. 1882) Article

J03-270 Analysis of Flow Conditions in Freejet Experiments for Studying Airfoil Self-Noise. Stéphane Moreau, Manuel Henner, *Valeo Motors and Actuators, France*; Gianluca Iaccarino and Meng Wang, *Stanford University*; and Michel Roger, *Ecole Centrale de Lyon, France* (41, 10, p. 1895) Article

J03-271 Electrokinetic Microactuator Arrays and System Architecture for Active Sublayer Control of Turbulent Boundary Layers. Francisco J. Diez and Werner J. A. Dahm, *University of Michigan* (41, 10, p. 1906) Article

J03-272 Effects of Periodic Blowing from Spanwise Slot on a Turbulent Boundary Layer. Kyoungyoun Kim and Hyung Jin Sung, *Korea Advanced Institute of Science and Technology* (41, 10, p. 1916) Article

J03-273 Adaptivity, Sensitivity and Uncertainty: Toward Standards of Good Practice in Computational Fluid Dynamics. D. Pelletier, É. Turgeon, D. Lacasse, and J. Borggaard, *École Polytechnique de Montréal, Canada* (41, 10, p. 1925) Article

J03-274 Verification and Validation for Laminar Hypersonic Flowfields Part 1: Verification. Christopher J. Roy, Mary A. McWhorter-Payne and William L. Oberkampf, *Sandia National Laboratories* (41, 10, p. 1934) Article

J03-275 Verification and Validation for Laminar Hypersonic Flowfields Part 2: Validation. Christopher J. Roy, William L. Oberkampf and Mary A. McWhorter-Payne, *Sandia National Laboratories* (41, 10, p. 1944) Article

J03-276 Experimental Investigations of Hypersonic Flow over Highly Blunted Cones with Aerospikes. Viren Menezes, *Indian Institute of Science, India*; and S. Saravanan, G. Jagadeesh, and K. P. J. Reddy, *Indian Institute of Science* (41, 10, p. 1955) Article based on AIAA Paper 2002-2709

J03-277 Influences of Blade Bowing on Flowfields of Turbine Stator Cascades. Chunqing Tan and Atsumasa Yamamoto, *National Aerospace Laboratory of Japan, Japan*; Shinpei Mizuki, *Hosei University, Japan*; and Haisheng Chen, *Chinese Academy of Sciences, PRC* (41, 10, p. 1967) Article based on AIAA Paper 2002-0378

J03-278 Gravitational Effects on Near-Field Flow Structure of Low Density Gas Jets. Tze-Wing Yip and Ajay K. Agrawal, *University of Oklahoma*; and DeVon Griffin, *NASA John H. Glenn Research Center at Lewis Field* (41, 10, p. 1973) Article

J03-279 Inverse Method for Identification of Acoustic Sources at Launch Vehicle Liftoff. Stephane Alestra, Isabelle Terrasse, *European Aeronautic Defence and Space Company Research Center, France*; and Bernard Troclet, *European Aeronautic Defence and Space Company Launch Vehicles, France* (41, 10, p. 1980) Article based on AIAA Paper 2002-0926

J03-280 Laser Energy Deposition in Quiescent Air. H. Yan, *Rutgers University*; R. Adelgren, *U.S. Air Force Test Pilot School*; M Boguszko, *Rutgers University*; G. Elliot, *University of Illinois at Urbana—Champaign*; and D. Knight, *Rutgers University* (41, 10, p. 1988) Article

J03-281 Bilevel Integrated System Synthesis for Concurrent and Distributed Processing. Jaroslaw Sobieszcanski-Sobieski, *NASA Langley Research Center*; Troy D. Altus and Matthew Phillips, and Robert Sandusky, *George Washington University* (41, 10, p. 1996) Article

J03-282 Value-Based Multidisciplinary Techniques for Commercial Aircraft System Design. Jacob Markish, *Charles River Associates*; and Karen Willcox, *Massachusetts Institute of Technology* (41, 10, p. 2004) Article

J03-283 Numerical Analysis of First and Second Cycles of Oxyhydrogen Pulse Detonation Engine. Soshi Kawai and Toshi Fujiwara, *Nagoya University, Japan* (41, 10, p. 2013) Article

J03-284 Strain Rate Effects on Unidirectional Carbon Fiber Composites. Amit G. Salvi, Jaeung Chung, and Anthony M. Waas, *University of Michigan*; and Ari Caliskan, *Ford Motor Company* (41, 10, p. 2020) Article

J03-285 Deterministic and Reliability-Based Optimization of Composite Laminates for Cryogenic Environments. Xueyong Qu and Raphael T. Haftka, *University of Florida*; Satchi Venkataraman, *San Diego State University*; and Theodore F. Johnson, *NASA Langley Research Center* (41, 10, p. 2029) Article

J03-286 Analysis and Experiment of Gas Leakage Through Composite Laminates for Propellant Tanks. Hisashi Kumazawa, *National Aerospace Laboratory, Japan*; Takahira Aoki, *University of Tokyo, Japan*; and Ippei Susuki, *National Aerospace Laboratory, Japan* (41, 10, p. 2037) Article

J03-287 Corrosion-Enhanced Fatigue and Multi-Site Damage. Robert P. Wei and D Gary Harlow, *Lehigh University* (41, 10, p. 2045) Article

J03-288 Thermoelastic Modeling and Vibration of Functionally Graded Thin-Walled Rotating Blades. Sang-Yong Oh and Liviu Librescu, *Virginia Polytechnic Institute and State University*; and Ohseop Song, *Chungnam National University, Republic of Korea* (41, 10, p. 2051) Article

J03-289 Uncertainty Quantification of Structural Response Using Evidence Theory. Ha-Rok Bae and Ramana V. Grandhi, *Wright State University*; and Robert A. Canfield, *Air Force Institute of Technology* (41, 10, p. 2062) Article

J03-290 Micromechanical Analyses of Instabilities in Braided Glass Textile Composites. Shu Ching Quek and Anthony M. Waas, *University of Michigan* (41, 10, p. 2069) Article

J03-291 Sensitivity to the Smagorinsky Constant in Turbulent Jet Simulations. Ali Uzun, Gregory A. Blaisdell, and Anastasios Lyrintzis, *Purdue University* (41, 10, p. 2077) Technical Note

J03-292 Thin Airfoil in Fields of Nonuniform Density, Part 1: Single Density Interface. Frank E. Marble, *California Institute of Technology* (41, 11, p. 2085) Article

J03-293 Thin Airfoil in Fields of Nonuniform Density, Part 2: Low-Density Strip. Frank E. Marble, *California Institute of Technology* (41, 11, p. 2095) Article

J03-294 Small-Scale Airfoil Aerodynamic Efficiency Improvement by Surface Temperature and Heat Transfer. Jongmin Kim, Zvi Rusak, and Nikhil Koratkar, *Rensselaer Polytechnic Institute* (41, 11, p. 2105) Article

J03-295 Reduction of the Adjoint Gradient Formula for Aerodynamic Shape Optimization Problems. Antony Jameson and Sangho Kim, *Stanford University* (41, 11, p. 2114) Article

J03-296 Thermal Regime of Catalyst Particles in Reactor for Production of Carbon Nanotubes. Alex Povitsky, *University of Akron*; and Manuel D. Salas, *NASA Langley Research Center* (41, 11, p. 2130) Article

J03-297 Large Eddy Simulation of Flow Around a Low Pressure Turbine Blade with Incoming Wakes. V. Michelassi, *Universität Karlsruhe, Germany*; J. G. Wissink, *Universität Karlsruhe, Italy*; and J. Fröhlich and W. Rodi, *Universität Karlsruhe* (41, 11, p. 2143) Article

J03-298 Comparison of Experimental and Numerical Studies of Ionizing Flow Over a Cylinder. Timothy J. McIntyre, Alexis I. Bishop, and Halina Rubinsztein-Dunlop, *University of Queensland, Australia*; and Peter A. Gnoffo, *NASA Langley Research Center* (41, 11, p. 2157) Article

J03-299 Effect of Vibrational Nonequilibrium on Hypersonic Double-Cone Experiments. Ioannis Nompelis and Graham V. Candler, *University of Minnesota*; and Michael S. Holden, *Calspan - University at Buffalo Research Center* (41, 11, p. 2162) Article

J03-300 Simultaneous Laser-Induced Fluorescence and Mie Scattering for Droplet Cluster Measurements. Laurent Zimmer, *National Aerospace Laboratory, Japan*; Roland Domann and Yannis Hardalupas, *Imperial College of Science, Technology, and Medicine, England, UK*; and Yuji Ikeda, *Kobe University, Japan* (41, 11, p. 2170) Article based on AIAA Paper 02-340

J03-301 Implicit Technique for Three-Dimensional Turbulent Magnetoaerodynamics. Datta V. Gaionde and J. Poggie, *U.S. Air Force Research Laboratory* (41, 11, p. 2179) Article

J03-302 Laser Induced Breakdown Spectroscopy of Hydrocarbon Flame and Rocket Engine Simulator Plume. Virendra N. Rai, Jadish P. Singh, Chris Winstead, Fang-Yu Yueh, and Robert L. Cook, *Mississippi State University* (41, 11, p. 2192) Article

J03-303 Lamination Parameters Applied to Reliability-Based In-Plane Strength Design of Composites. N. Kogiso, Shuuya Nakagawa, and Yoshisada Murotsu, *Osaka Prefecture University, Japan* (41, 11, p. 2200) Article

J03-304 Efficient High-Order Frequency Interpolation of Structural Dynamic Response. Christophe Lecomte, J. Gregory McDaniel, Paul E. Barbore, and Allan D. Pierce, *Boston University* (41, 11, p. 2208) Article

J03-305 Analysis of the Effects of Thin Sealant Layers in Aircraft Structural Joints. Charoenyut Dechwayukul, *Prince of Songkhla University*; and Carol A. Rubin and George T. Hahn, *Vanderbilt University* (41, 11, p. 2216) Article

J03-306 Prediction of Nonlinear Behavior of Composites via Micromechanics Using Matrix Bulk Properties. Virendra R. Jadhav, *Endicott Interconnect Technologies*; and Srinivasan Sridharan, *Washington University in St. Louis* (41, 11, p. 2229) Article

J03-307 Failure Prediction of Composite Lugs Under Axial Loads. C. Kassapoglou and W. A. Townsend, *Sikorsky Aircraft* (41, 11, p. 2239) Article

J03-308 Exact Solutions of Cross-Ply Laminates with Bonding Imperfections. W. Q. Chen, J. B. Cai, and G. R. Ye, *Zhejiang University, PRC* (41, 11, p. 2244) Article

- J03-309 Effect of Temperature on the Process of Hypervelocity Gouging.** David J. Laird and Anthony N. Palazotto, *U.S. Air Force Institute of Technology* (41, 11, p. 2251) Article
- J03-310 Vibration Analysis of Composite Wing Structures by a Matrix Form Comprehensive Model.** Chyanbin Hwu, and H.S. Gai, *National Cheng-Kung University, Taiwan, ROC* (41, 11, p. 2261) Article
- J03-311 Layup Optimization Considering Free-Edge Strength and Bounded Uncertainty of Material Properties.** Maenghyo Cho, and Seung Yun Rhee, *Seoul National University, Republic of Korea* (41, 11, p. 2274) Article
- J03-312 Design Strategy with a Class of Structural Reliability Models of High Dimension.** Hector A. Jensen, *Santa Maria University, Chile* (41, 11, p. 2283) Article
- J03-313 Dynamic Loading Methodologies.** Monty A. Moshier and Ronald L. Hinrichsen, *RHAMM Technologies*; and Gregory J. Czarnecki, *U.S. Air Force Research Laboratory* (41, 11, p. 2291) Technical Note
- J03-314 Sound Waveform Effect on Disturbance Generation in Turbulent Jets at Aeroacoustic Interaction.** V. G. Pimshtein, *Central Aerohydrodynamic Institute* (41, 11, p. 2294) Technical Note
- J03-315 Optimal Disturbances in Boundary Layers Subject to Streamwise Pressure Gradient.** Anatoli Tumin, *University of Arizona*; and David E. Ashpis, *NASA John H. Glenn Research Center at Lewis Field* (41, 11, p. 2297) Technical Note
- J03-316 In-Situ Calibration Uncertainty of Pressure-Sensitive Paint.** Tianshu Liu, *NASA Langley Research Center*; and John P. Sullivan, *Purdue University* (41, 11, p. 2300) Article
- J03-317 Region of Flutter and Buckling Instability for a Cracked Beam.** Q. Wang, *University of Central Florida*; and C. G. Koh, *National University of Singapore, Singapore* (41, 11, p. 2302) Technical Note
- J03-318 Effects of Pulsing on a Vortex Generator Jet.** Hamid Johari and G. S. Rixon, *Worcester Polytechnic Institute* (41, 12, p. 2309) Article based on AIAA Paper 2002-2834
- J03-319 The Dynamics and Control of an Isolated Jet in Cross Flow.** S. Narayanan, *United Technologies Research Center*; P. Baroah, *University of California, Santa Barbara*; and J. M. Cohen, *Pratt and Whitney* (41, 12, p. 2316) Article
- J03-320 Analysis of Locally Irregular Composites Using High-Fidelity Generalized Method of Cells.** Marek-Jerzy Pindera, *University of Virginia*; Jacob Aboudi, *Tel-Aviv University, Israel*; and Steven M. Arnold, *NASA John H. Glenn Research Center at Lewis Field* (41, 12, p. 2331) Article
- J03-321 Characteristic Interface Conditions for Multiblock High-Order Computation on Singular Structured Grid.** Jae Wook Kim and Duck Joo Lee, *Korea Advanced Institute of Science and Technology, Republic of Korea* (41, 12, p. 2341) Article
- J03-322 Compressible Linear Stability of Confluent Wake/Boundary Layers.** William W. Liou and Fengjun Liu, *Western Michigan University* (41, 12, p. 2349) Article
- J03-323 Optimal Disturbances on Compressible Boundary Layers.** Anatoli Tumin, *University of Arizona*; and Eli Reshotko, *Case Western Reserve University* (41, 12, p. 2357) Article
- J03-324 Numerical Simulation of Vectoring of a Primary Jet with a Synthetic Jet.** Dahai Guo, Andrew W. Cary, and Ramesh K. Agarwal, *Washington University* (41, 12, p. 2364) Article based on AIAA Paper 2002-3284
- J03-325 Deformation and Drag Properties of Round Drops Subjected to Shock Wave Disturbances.** C. Aalburg, B. van Leer, and G. M. Faeth, *University of Michigan* (41, 12, p. 2371) Article
- J03-326 Extension of a Compressible Code Toward the Incompressible Limit.** Cord-Christian Rossow, *Deutsches Zentrum für Luft- und Raumfahrt* (41, 12, p. 2379) Article
- J03-327 Identification and Control of Taylor-Görtler Vortices in Turbulent Curved Channel Flow.** Chun-Xiao Xu, Jung-II Choi, and Hyung Jin Sung, *Korea Advanced Institute of Science and Technology, Korea* (41, 12, p. 2387) Article
- J03-328 Influence of Orifice Orientation on a Synthetic Jet-Boundary Layer Interaction.** Amanda Bridges and Douglas R. Smith, *University of Wyoming* (41, 12, p. 2394) Article
- J03-329 Drag Reduction by Plasma Filaments over Supersonic Forebodies.** V. R. Soloviev, V. M. Krivtsov, and A. M. Konchakov, *Moscow Institute of Physics and Technology, Russia*; and N. D. Malmuth, *Rockwell Scientific Company* (41, 12, p. 2403) Article based on AIAA Paper 2001-2727
- J03-330 Large-Scale Structures in a Compressible Mixing Layer over a Cavity.** J. Poggie, *U.S. Air Force Research Laboratory*; and A. J. Smits, *Princeton University* (41, 12, p. 2410) Article
- J03-331 Flow Visualization of Numerically Simulated Blast Waves Discharging from an Open Ended Duct.** S. M. Liang and H. Chen, *National Cheng-Kung University, Taiwan, ROC* (41, 12, p. 2420) Article
- J03-332 Real-Gas Effects on Mean Flow and Temporal Stability of Binary-Species Mixing Layers.** Nora Okong'o and Josette Bellan, *Jet Propulsion Laboratory, California Institute of Technology* (41, 12, p. 2429) Article
- J03-333 Optimum Control Voltage Design for Constrained Static Shape Control of Piezoelectric Structures.** Dongchang Sun and Liyong Tong, *University of Sydney, Australia* (41, 12, p. 2444) Article
- J03-334 Coherent Anti-Stokes Raman Spectroscopic Thermometry in a Supersonic Combustor.** A. D. Cutler, *George Washington University*; P. M. Danehy, *NASA Langley Research Center*; R. R. Spinger, *George Washington University*; and S. O'Byrne, D. P. Capriotti, and R. DeLoach, *NASA Langley Research Center* (41, 12, p. 2451) Article based on AIAA Paper 2002-0743
- J03-335 Examining the Effect of Flow Reversal on Seven-Hole Probe Measurement.** A. J. Pisasale and N. A. Ahmed, *University of New South Wales, Australia* (41, 12, p. 2460) Article

J03-336 Oil-Film Interferometry Skin-Friction Measurement Under White Light. Jean-Michel Desse, *ONERA, France* (41, 12, p. 2468) Article

J03-337 Structural Control Using Inverse H_2 Optimal Theory. C. R. Ashokkumar and Singiresu S. Rao, *University of Miami* (41, 12, p. 2478) Article

J03-338 Thermomechanical Postbuckling Response and First-Ply Failure Analysis of Doubly Curved Shell Panels . Maloy K. Singha and L. S. Ramachandra, J. N. Bandyopadhyay, *Indian Institute of Technology, India* (41, 12, p. 2486) Article

J03-339 Membrane Wing Model for Micro Air Vehicles. Yongsheng Lian, Wei Shyy, and Peter G. Ifju, *University of Florida*; and Erwan Verron, *Laboratoire Mécanique et Matériaux* (41, 12, p. 2492) Technical Note

J03-340 Enhancement of Damage Identification Through Structural Matrix Assignment. Jason A. Solbeck and Laura R. Ray, *Dartmouth College* (41, 12, p. 2494) Technical Note

J03-341 Thermal Postbuckling of Uniform Spring-Hinged Columns Using a Simple Method. G. Venkateswara Rao and K. Kanaka Raju, *Vikram Sarabhai Space Center, India* (41, 12, p. 2497) Technical Note

J03-342 Elasticity Solution for Stresses in a Sandwich Beam with Functionality Graded Core. Satchi Venkataraman, *San Diego State University*; and Bhavani V. Sankar, *University of Florida* (41, 12, p. 2501) Technical Note

J03-343 Triangular Shell Element for Large Rotations Analysis. R. Levy, *Technion—Israel Institute of Technology*; and E. Gal, *Ben Gurion University of the Negev, Israel* (41, 12, p. 2505) Technical Note
